

Data Subject Access Request Handling Policy

When a data subject submits a request for access to their personal data, it is essential that we handle this request in accordance with applicable laws and regulations. As described under the 'Data Protection Policy', our organization is committed to respecting the rights of individuals and providing them with control over their personal information. In order to fulfill these obligations, we have established a Data Subject Access Request Handling Policy.

Upon receipt of a data subject access request, the relevant department or team will review the request to ensure that it meets the criteria for processing under applicable laws and regulations. If the request is deemed valid, the data subject's personal data will be retrieved from our systems and provided in response within 30 calendar days. As described under the 'Engineering On-Call Rotation Policy', we must also consider any potential impact on our IT infrastructure when fulfilling these requests, ensuring that our systems are not compromised or disrupted during this process.

It is essential to note that all data subject access requests will be logged and tracked centrally by the Privacy Office, in accordance with the 'Data Protection Policy'. This centralized tracking system enables us to monitor and analyze the volume of requests received, identify trends and patterns, and ensure that we are meeting our obligations under applicable laws. Furthermore, as described under the 'Gift and Entertainment Acceptance Policy', we must also be mindful of any potential conflicts of interest or biases when handling these requests, ensuring that our decision-making processes remain impartial and unbiased.

In order to fulfill data subject access requests in a timely and efficient manner, it is crucial that all relevant teams and departments work together seamlessly. We will provide regular updates on the status of each request to the data subject, keeping them informed throughout the process. By following this policy, we can ensure that our organization remains compliant with applicable laws and regulations, while also demonstrating our commitment to respecting the rights of individuals and providing them with control over their personal information.
