

Diversity, Equity, and Inclusion Commitment Policy

Our organization is committed to fostering an inclusive and equitable work environment that values diversity in all its forms. This commitment is reflected in our daily operations, from hiring practices to employee interactions, and is essential for driving innovation, creativity, and success. As part of this commitment, we recognize the importance of creating a workplace culture where everyone feels valued, respected, and empowered to contribute their unique perspectives and experiences.

To achieve this goal, we have implemented various policies and procedures that promote diversity, equity, and inclusion (DEI). For example, our hiring process includes a diverse interview panel that must consist of at least two members from different teams. This ensures that candidates are evaluated on their qualifications, skills, and fit for the role, while also providing an opportunity for team members to share their perspectives and insights. Additionally, we require all people managers to complete annual DEI training, which helps them develop the knowledge, skills, and competencies needed to create a more inclusive work environment.

As part of our broader commitment to creating a safe and secure workplace, we have implemented various policies and procedures that protect employee data and ensure compliance with relevant regulations. For instance, as described under the Third-Party Security Audit Procedure, we conduct regular security audits to identify vulnerabilities and implement measures to mitigate risks. Similarly, when responding to Data Subject Access Request (DSAR) requests from employees or external individuals, we follow the guidelines outlined in our Data Subject Access Request Handling Policy to ensure that personal data is handled with care and respect.

Our commitment to DEI also extends to our interactions with external partners and stakeholders. We recognize the importance of building trust and credibility with diverse communities and organizations, and strive to create mutually beneficial relationships that promote social responsibility and sustainability. By working together, we can drive positive change and create a more just and equitable society for all.

By living out this commitment every day, we aim to build an organization that is not only successful but also responsible and accountable to the world around us.
