

Vendor Onboarding Checklist

When onboarding a new vendor, it is essential to ensure that all necessary steps are taken to establish a secure and compliant relationship. As described under the 'Security and Compliance Policy', all new vendors must complete a comprehensive security questionnaire before contract signature. This questionnaire will assess the vendor's ability to protect sensitive company information and adhere to our data protection standards.

In addition to completing the security questionnaire, vendors must also provide proof of liability insurance that meets or exceeds our minimum requirements as outlined in the 'Liability Insurance Policy'. Furthermore, vendors are required to provide a detailed description of their business operations and services, including any employee access credentials. As described under the 'Employee Equipment Provisioning Policy', vendor-provided equipment must be properly provisioned and managed to ensure compliance with company standards.

Once the onboarding process is complete, vendors will receive an initial set of access credentials that grant them permission to access our systems and data. However, these credentials are only valid for a period of 12 months from the date of issuance. As described under the 'Paid Time Off Accrual Policy', any accrued paid time off by the vendor during this period must be properly documented and accounted for in accordance with company policies.

To maintain compliance and ensure ongoing security, vendors are responsible for renewing their access credentials on a regular basis. Failure to do so may result in revocation of access privileges. It is also essential that vendors adhere to our data retention and disposal procedures as outlined in the 'Data Retention and Disposal Policy', to prevent unauthorized disclosure or loss of sensitive information.

By following this vendor onboarding checklist, we can ensure a secure and compliant relationship with our new vendors, while also maintaining our commitment to protecting sensitive company information.
