

Workplace Health and Safety Policy

The safety of our employees is of utmost importance, and we take all necessary steps to ensure that our workplace is free from hazards and risks. As part of this commitment, we have established a comprehensive Workplace Health and Safety Policy that outlines our expectations for maintaining a safe working environment. This policy applies to all on-site employees and contractors who work within our facilities.

All workplace injuries must be reported to the Facilities department within 24 hours of occurrence. This ensures that any potential hazards are identified and addressed promptly, minimizing the risk of further injury or harm. As described under the Litigation Hold and Records Preservation Procedure, all incident reports will be thoroughly documented and preserved in accordance with our company's legal requirements.

To ensure that all employees have the necessary knowledge and skills to work safely, annual safety training completion is mandatory for on-site employees. This training covers essential topics such as hazard recognition, emergency procedures, and personal protective equipment usage. As outlined under the Mobile Device Management and BYOD Policy, employees are expected to follow company guidelines when using personal devices in the workplace, including adhering to our mobile device management policies.

Our Workplace Health and Safety Policy is regularly reviewed and updated to reflect changes in industry standards, regulatory requirements, and emerging risks. We encourage all employees to report any safety concerns or suggestions for improvement to their supervisor or HR representative. By working together, we can maintain a safe and healthy work environment that supports the well-being of our employees.

We are committed to providing a workplace where all employees feel valued, supported, and empowered to contribute to our company's success while maintaining their physical and mental health.
